## **Selected Commercial Projects in Boston**

### **Post 390**

#### **New Restaurant on corner of Clarendon & Stuart St.**

Installation of plaster paintings and paneled painted wood mural .

**Architect: Niemitz Design Group**

### **101 Arch Street**

#### **Coffered ceilings with Colored Plaster and tinted gold wax**

The gold colored plaster was burnished and then waxed with a mixture of gold oil paint and white beeswax and carnuba. The ceiling has a gold leaf affect because of the scale of the texture and the brilliance of the color, especially when lit.

**Architect: Elkus Manfredi Architects**

### **Pembroke Realty**

#### **Feature Wall in Lobby Renovation, 255 State Street**

The feature wall, which includes a gas fireplace, was painted in thin layers of glazes, several of which included an iridescent pearl. This gives the wall a slight shimmer but with a subtlety.

**Architect: Elkus Manfredi Architects**

### **Boston Consulting Group**

#### **Murals on Glass, Conference Room, Exchange Place**

The design, a stylized leaf pattern, was painted on both sides of the glass. Random areas were scraped away giving it both a hand painted and industrial look. The mural creates a screen for a conference room without closing in the adjacent hallway.

**Architect: Elkus Manfredi Architects**

### **Wellington Investment Management**

#### **Colored Wax Plaster Trading Room Wall, Federal Street**

The curved wall was finished in a deep red/brown plaster and burnished with beeswax and highly buffed.

**Architect: MP architects**

### **Four Seasons Hotel**

#### **Painted Strie, Banquet and Meeting Rooms**

The finishes applied to both rooms were in soft traditional strie, which give the oversize room more warmth.

**Architect: CBT Architects**

Studio located at Stove Factory Building, 523 Medford Street, Charlestown  
Member/Contractor of the Union of Painters and Allied Trades
